7. Pin Definition

The QSFP+ modules are hot-pluggable. Hot pluggable refers to plugging in or unplugging a module while the host board is powered. The QSFP+ hot connector is a 0.8mm pitch 38 position right angle improved connector specified by SFF-8436, or stacked connector with equivalent electrical performance. Host PCB contact assignment is shown in Figure 1 and contact definitions are given in the table below.

Notes:

1. Module circuit ground is isolated from module chassis ground within the module
2. Open collector, should be pulled up with 4.7K-10K ohms on the host board to a voltage between 3.15V and 3.6V.

8. 2-wire Management Interface

The transceivers provide management two-wire interface and the management memory map is specified by SFF-8436.

9. ESD

This module high speed pins withstand 1KV electrostatic discharge on Human Body Model per JESD22-A114. The exception of high speed pins withstand 2KV electrostatic discharge based on Human Body Model per JESD 22-A114. The QSFP+ module meet ESD requirement in EN61000-4-2, criterion B test specification. The transceiver is shipped in ESD protective packaging. It should be removed from the packaging and handled only in an ESD protected environment.
